

<b>1</b>	<b>Foreword</b>	<b>1</b>
<b>2</b>	<b>General and special requirements</b>	<b>5</b>
2.1	Introduction	5
2.2	Delimitation between windows, doors and curtain walls	5
2.3	Scope	9
2.4	Construction types	12
2.4.1	Mullion and transom facade	12
2.4.2	Element facade	13
2.4.3	Glued glass constructions	14
2.4.4	Warm facade (not ventilated)	15
2.4.5	Cold facade (ventilated) rear-ventilated curtain wall (VHF)	15
2.4.6	Cold-warm facade	18
2.4.7	Second skin facade (double facade)	19
2.4.8	Glass roof constructions, conservatories, integrated inclined glazing	20
2.5	Frame materials/combinations	21
2.6	Effects on curtain walls in the building envelope	23
2.7	Level model	29
2.8	Special requirements	35
2.8.1	Earthquake	35
2.8.2	Earthquakes Security of use	35
2.8.3	Earthquake suitability for use	35
2.8.4	Electrical potential equalization	36
2.9	Special features in old buildings	37
<b>3</b>	<b>Tasks of planning</b>	<b>39</b>
3.1	Execution Planning	39
3.1.1	Interface building connection	39
3.1.2	Minimum planning requirements	41
3.1.3	Example of ground connection and threshold formation	53
3.2	Workplace and assembly planning by the executor	61
3.2.1	Basics	61
3.2.2	Connection examples	64

<b>4</b>	<b>Building physics</b>	<b>65</b>
4.1	Relevant technical regulations	65
4.2	Thermal protection and moisture protection	66
4.2.1	Basics	66
4.2.2	Requirements for thermal insulation and energy saving in buildings	67
4.3	Sound insulation	94
4.3.1	Requirements	94
4.3.2	Connection details	99
4.3.3	Planning the sound insulation	109
4.3.4	Resulting sound insulation taking joints into account	112
4.3.5	Characteristics of curtain wall connections to be observed during assembly	115
4.4	Fire protection	120
4.4.1	Preliminary remarks	120
4.4.2	Reaction to fire	122
4.4.3	Fire spread	123
4.4.4	Fire resistance	123
4.4.5	Fire overturns	123
4.4.6	Smoke protection	126
4.5	Summary	127
<b>5</b>	<b>Anchoring and load transfer</b>	<b>129</b>
5.1	Acting forces, dead weight	129
5.2	Requirements for curtain walls	131
5.3	Static systems	132
5.3.1	Mullion -transom facade	132
5.3.2	Element facades	133
5.3.3	Rear-ventilated curtain walls (VHF)	134
5.4	Anchor points (supports) on curtain walls	136
5.4.1	Anchor points for mullion-transom facades	136
5.4.2	Anchor points for element facades	138
5.4.3	Anchor points at VHF	139
5.5	Corrosion protection	141
5.5.1	Corrosion protection of anchors, fasteners and connection elements	142
5.5.2	Avoidance of contact corrosion	143

5.6	Anchor and fastening agents	144
5.6.1	Consoles	145
5.6.2	Dowel anchorages	147
5.6.3	Mounting with inserts	148
5.6.4	Anchor rails	148
5.6.5	Anchor plates for welded joints (Welding plates)	149
5.7	Special requirements for anchoring agents	150
5.7.1	Fire protection anchorages	150
5.7.2	Anchoring of anti-burglar curtain walls	150
5.7.3	Anchoring curtain walls with fall protection properties	151
<b>6.</b>	<b>Sealing</b>	<b>153</b>
6.1	Building requirements	153
6.2	Sealing planes	154
6.3	Types of joints	157
6.3.1	Special case: Structural joints	158
6.3.2	Building component connecting joints	159
6.4	Sealing systems	160
6.4.1	Sealing films/ joint sealing films	161
6.4.2	Gunnable joint sealants	166
6.4.3	Impregnated joint-sealing tapes made of cellular plastics “Compri-Tape”	169
6.4.4	Sprayable or paintable film materials	170
6.5	Water vapour diffusion performance of the sealing systems	171
6.6	Insulation in the connection area	173
6.7	Recommendations for sealing	173
<b>7</b>	<b>Practical execution</b>	<b>175</b>
7.1	Installation planning of curtain walls	175
7.2	Sequence of trades	178
7.3	Protection of components on the construction site	180
7.4	Tolerances	181
7.5	Dilatation of curtain walls and VHF	183
7.5.1	Dimensional changes due to temperature	184
7.5.2	Moisture-related dimension changes	185
7.6	Preparatory measures, target / actual comparison	187

7.7	Professional use of sealing systems	187
7.7.1	Joint sealing - joint sealing foils and sealing foils	188
7.7.2	Joint sealing – Sprayable sealants	190
7.7.3	Joint sealing - Impregnated, pre-compressed joint sealing tapes	192
7.8	Electrical connections in curtain walls	194
7.9	Execution of curtain walls and VHF in the area of building joints	194
7.10	Sealing floor-to-ceiling elements	195
7.11	Documentation	205
7.11.1	Entrepreneur Declaration	205
7.11.2	Specialist contractor declaration	205
7.11.3	Documentation for the Client	205
7.12	Visual assessment of irregularities, defects and damage to curtain walls and VHF	206
7.12.1	Applicable guidelines	206
<b>8</b>	<b>Execution examples</b>	<b>211</b>
8.1	Wood-metal curtain wall	212
8.1.1	Vertical section upper ceiling connection at the outside wall with VHF	212
8.1.2	Vertical section of floor ceiling connection	214
8.1.3	Vertical cut parapet connection for external wall with VHF	216
8.1.4	Horizontal cut lateral connection on external wall with VHF	218
8.2	Mullion and transom facade in aluminum construction	220
8.2.1	Vertical section Floor connection	222
8.2.2	Horizontal section floor slab connection	224
8.2.3	Vertical section basepoint, Variant 1	226
8.2.4	Vertical section basepoint connection, Variant 2	228
8.2.5	Horizontal section side wall connection at the outside wall with ETICS	230
8.3	Element facade in aluminum construction	232
8.3.1	Vertical section of the upper ceiling connection with the parapet	232
8.3.2	Vertical section floor slab connection	234
8.3.3	Vertical section base point connection, Variant 1	236
8.3.4	Vertical section base point connection, Variant 2	238
8.3.5	Horizontal cut lateral wall connection for external wall with external wall VHF, Variant 1	240
8.3.6	Horizontal section of lateral wall connection with external wall VHF, Variant 2	242
8.4	Light roof with steel top construction	244
8.4.1	Vertical cut eaves connection	246
8.4.2	Vertical section of access road connection	248

<b>9</b>	<b>Bibliography / List of Figures</b>	<b>251</b>
9.1	Cited standards and references, guidelines and leaflets	251
9.2	Further literature	264
9.3	Figures, Tables and Drawings	265
