

<b>Plenary</b>		<b>Control Systems &amp; Design</b>	69
<i>Ulrich Sieberath</i> <b>Foreword</b>	1	<i>Jörn P. Lass</i> <b>Modular design of windows and facades</b> Windows for any purpose – accomplished design of plastic, aluminium and wood windows using the modular system	71
<i>Ulrich Sieberath</i> <b>40 years in the Development – are we ready for the Future?</b> The technical and human Limits to what is possible – Ideas and Visions	3	<i>Prof. Dr.-Ing. Michael Krödel</i> <b>Controls, sensors and what now?</b> Criteria and technical solutions for the installation of sensors, actuators and controls in windows and facades	77
<i>Prof. Dr.-Ing. Ulrich Knaack</i> <b>Building Envelopes for Tomorrow – Smart, Green, Modular</b> Developing and using new materials, designs and shapes	9	<i>Dr.-Ing. Steffen Feirabend</i> <b>Facades in 3D</b> Loadbearing structures in glass fibre reinforced concrete – a selection of buildings to illustrate requirements and technology	81
<i>Prof. Dr.-Ing. Klaus Sedlbauer</i> <b>Buildings and Facades for the “City of the Future”</b> Technologies and requirements for sustainable, commercially viable and attractive buildings for 5 billion city dwellers	17	<b>Modern Glass Technology</b>	85
<b>Modernising &amp; Refurbishing</b>	21	<i>Karin Lieb</i> <b>Triple glazing – always the answer?</b> Limits and possibilities, from safety glazing to solar screening	87
<i>Norbert Sack</i> <b>Designs of Ventilation Systems in existing Buildings made easy</b> Desing principles and documentation evidence in accordance with DIN 1946-6 and practical applications with windows and window vents	23	<i>Prof. Dr.-Ing. Benno Eierle, Harald Krewinkel</i> <b>Safety barriers made of glass – evidence by calculation rather than testing?</b> The application of E DIN 19008-4	93
<i>Jürgen Hofmann</i> <b>Windows as Part of Building Refurbishment</b> Planning and monitoring window replacement from the perspective of a building energy consultant, illustrated with practical examples	31	<i>Prof. Dr. Franz Feldmeier</i> <b>The Evolution of multi-skin facades</b> Taking the idea of insulating glass units further	99
<i>Peter Rathert</i> <b>Energy turnaround: What are the benefits of EnEV 2013 and KfW funding programmes?</b> The effects of the legal framework conditions for windows, facades and glass	37	<b>Market &amp; Trends</b>	103
<b>Universal Design</b>	39	<i>Prof. Christian Niemöller</i> <b>Construction Products Regulation – update for the CE mark</b> Declaration of performance instead of declaration of conformity – effect on liability risks, documentary evidence and marking	105
<i>Thomas Bade</i> <b>Universal Designs – Opportunities for building components</b> Consequences for the design and marketing of windows and facades	41	<i>Dr. Birgit Memminger-Riev</i> <b>The power of LEED®, BREEAM and DGNB</b> The influence of building certifications on product decisions and the design and specifications of windows and facades	109
<i>Ulrike Rau</i> <b>Building for all ages</b> Energy upgrades and modernising for the future	43	<i>Martin Langen</i> <b>Premium construction in 2012 – opportunities for quality professionals</b> Knowing and using the market potential, customer groups and products in the premium construction segment	115
<i>Susanne Gosztanyi</i> <b>BioSkin – Learning from Nature</b> Use of bionic concepts/biomimetics in the future design and engineering of building envelopes	47	<b>Detecting &amp; Avoiding Faults</b>	119
<b>Operational Practice &amp; Quality</b>	53	<i>Werner Stiell</i> <b>Learning from Faults</b> Detecting design errors at an early stage in order to avoid faults	121
<i>Josef Steretzeder</i> <b>Energy-saving production concepts</b> Energy-efficient production concepts with low CO <sub>2</sub> emissions are reliable, reduce costs and help promote sales	55	<i>Wolfgang Jehl</i> <b>Window installation in Composite Thermal Insulation Systems</b> Reliable systems for RAL-conforming installations with expert fastening, structural safety, sealing and fire safety	129
<i>Prof. Andreas Fuchs</i> <b>Upgrade Facades</b> Modular systems for upgrading the building envelope for improved energy efficiency	59	<i>Martin Heßler</i> <b>Zero Error Strategies for installation, including connection details with the building fabric</b> Design aids and site supervision, from specification to handover	135
<i>Christian Kehrer</i> <b>Quality Management in the window industry with Web, Cloud &amp; Co.</b> Using online services for quality assurance, documentary evidence and document management	63		

<b>Energy Efficiency</b> .....	141
<i>Manuel Demel</i>	
<b>Energy Efficiency with modular window designs</b>	
Intelligent use of components and assessment in accordance with Energy Label and EnEV easy .....	143
<i>Christian Stolte</i>	
<b>Cost-Efficient Window Replacement</b>	
Useful decision and assessment criteria or window replacement from the perspective of client and designers .....	149
<i>Kurt Emil Eriksen</i>	
<b>From passive to active</b>	
“Active House” – a vision of buildings that gives more than they take .....	153
<b>Media cooperation</b> .....	159
